

ALEXIS ROJAS

FULL STACK DEVELOPER

+52 474 135 7523 | rojasbrian025@gmail.com | Jalisco, México

PROFILE

Full Stack Developer with 4 years of experience designing, building, and scaling web applications across Django, Laravel, React, Angular, and Next.js. Proven problem-solver with a proactive, ownership-driven approach to delivering reliable, well-structured software. Hands-on experience implementing AWS services (S3, SES, IAM, Lambda) for scalable, cloud-based solutions, and leading the migration of a legacy system to a modern stack, improving performance, maintainability, and scalability. Skilled at mentoring teams and driving adoption of best practices in fast-paced, agile environments.

WORK EXPERIENCE

Full Stack Developer | ClickIT DevOps & Software Development

December 2025 – Present

- Develop and maintain dynamic web applications using Django, Laravel, and Node.js on the backend, and React and Angular on the frontend, ensuring robust and scalable architecture.
- Design, build, and consume RESTful APIs that support cross-platform integrations and interactive user interfaces.
- Implement AWS services (S3, SES, IAM) to deliver secure, cloud-based storage, messaging, and access-control solutions.
- Proactively identify and resolve performance bottlenecks and bugs through structured debugging and testing, improving overall software quality.
- Work with MySQL relational databases, optimizing queries, foreign keys, and schema design for performance and data integrity.
- Implement secure permission management and access control across applications to protect sensitive data.
- Collaborate within Scrum teams, contributing to sprint planning and continuous delivery of high-quality features.

Full Stack Developer | TechGenies Software Application Development Services

March 2023 – December 2025

- Led the migration of a legacy application to a modern Laravel and React/Angular stack, significantly improving structure, performance, and long-term scalability.
- Built and consumed APIs to connect backend services with dynamic, user-facing frontend applications.
- Applied object-oriented programming and inheritance principles to design maintainable, reusable code across migrations, controllers, services, and components.
- Worked with relational databases (MySQL), ensuring data consistency and efficient query performance.
- Implemented permission management and access-control security measures to safeguard application data.
- Took a proactive role in debugging and testing, reducing production issues and improving delivery reliability.
- Collaborated in Agile/Scrum teams, consistently delivering solutions aligned with business goals.

SKILLS

Backend: Django, Python, Laravel, Node.js, Java, Perl

Frontend: React, Next.js, Angular, TypeScript, JavaScript

Cloud & DevOps: AWS (S3, SES, IAM, Lambda), Docker

Database: MySQL / MariaDB, relational data modeling & optimization

Tools & Practices: Git/GitHub, Jira, SourceTree, Postman, Scrum/Agile, RESTful APIs

Core strengths: Problem-solving, proactive ownership, debugging & testing, cross-team mentoring

EDUCATION

Universidad de Guadalajara – CULagos

Professional License No. 15199747
